

Tenable for Fortinet

Improve Incident Response with Security Orchestration, Automation and Response

Business Challenge

Organizations struggle with focus and upkeep on security tools within their security environment. These gaps put them at greater risk and continually grow the threat landscape. Without integrating Tenable's vulnerability data into the Fortinet security orchestration, automation and response platform, organizations are left without a way to utilize automated workflows and maximize resources for accelerated incident response.

Solution

The Fortinet integration with Tenable combines Tenable's Cyber Exposure insights with Fortinet's SOAR engine for complete visibility into an organization's security infrastructure and attack surface. Security and IT teams are provided with management insights, pre-configured workflows and real-time dashboards to automate time-intensive, manual processes for streamlined incident response. Organizations can utilize the integration to represent and correlate vulnerabilities, assets and scan data from Tenable combined with Fortinet's SOAR engine for improved incident response.

Value

The Fortinet integration for Tenable provides the ability to:

- Provide pre-defined parameters for running Vulnerability Management scans without requiring knowledge about Vulnerability Management configuration & internal network infrastructure
- Define approval processes for running one-off infrastructure vulnerability scans
- Allow for the creation of automated workflows across security tools
- Centralize your vulnerability insights by viewing a single dashboard

Technology Components

- Tenable.io
- Fortinet FortiSOAR

Key Benefits

- **Improve incident response time**
- **Enrich incident response** with vulnerability context
- **Improve processes** with configured workflows
- **Automate** your teams' manual tasks
- **Connect** Tenable to disparate security tools

ABOUT TENABLE

Tenable®, Inc. is the Cyber Exposure company. Over 30,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world's first platform to see and secure any digital asset on any computing platform. Tenable customers include more than 50 percent of the Fortune 500, more than 30 percent of the Global 2000 and large government agencies. Learn more at www.tenable.com.

ABOUT FORTINET

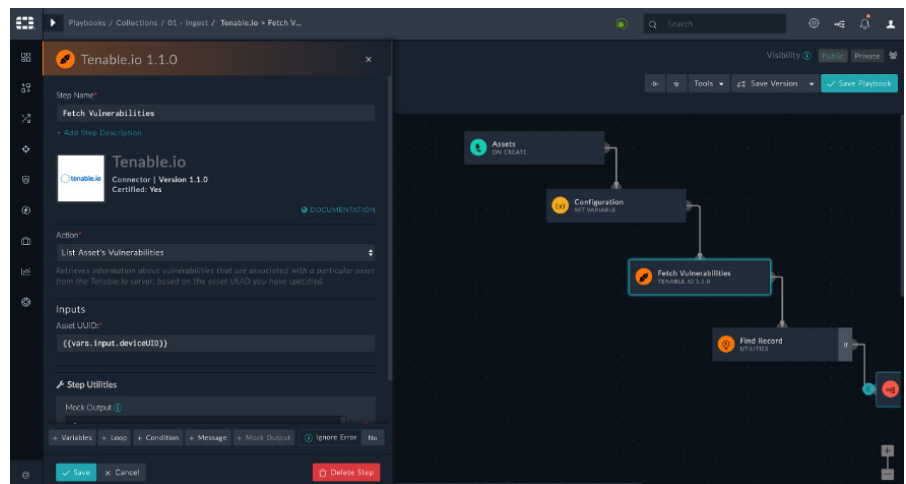

Fortinet (NASDAQ: FTNT) secures the largest enterprise, service provider, and government organizations around the world. Fortinet empowers its customers with intelligent, seamless protection across the expanding attack surface and the power to take on ever-increasing performance requirements of the borderless network - today and into the future. Only the Fortinet Security Fabric architecture can deliver security without compromise to address the most critical security challenges, whether in networked, application, cloud or mobile environments. More than 450,000 customers worldwide trust Fortinet to protect their businesses.

Features

For **Tenable.io** you can:

- Get a list of available scans
- Launch a scan
- List assets of a given scan
- Get Plugin details
- Get all Vulnerabilities
- Get all Assets

The Diagram shows Tenable vulnerability findings supplementing Fortinet's SOAR platform that allows security and IT teams to have full visibility into their security infrastructure and attack surface.
